

DAMALGA

GRAPHIC DESIGNER AND WEB DEVELOPER

Madrid, Spain (Europe) | damalga@protonmail.com | <https://damalga.com> | github.com/damalga | [linkedin.com/in/damian-a-8052ba392](https://www.linkedin.com/in/damian-a-8052ba392)

> WHO AM I?

Damian Alcaraz García. I've worked as a graphic designer and front-end developer for the last 10 years. I've built a large number of interfaces with HTML, CSS and JavaScript. I've never worked with Angular, but I have with React and Vue. I understand well how both work and which one fits best depending on the circumstances. However, in my professional experience what I've done the most is designing and building for every browser and screen. I have a huge devotion for managing the DOM efficiently and for making what I build load as fast as possible. Also for taking responsive design to the pixel and for building clean, reusable and easy to maintain components. I also feel comfortable with GNU/Linux, Git and the terminal, with hands-on experience in networking and system administration. Design fascinates me, but so does infrastructure. I love understanding how servers send data and how they communicate with browsers to render the information.

> PROJECTS

Hackeed - <https://hackeed.es>

Online store and technology lab. – *Web:* Vue3 for the interface, Netlify for deployments and edge functions connecting to Neon (PostgreSQL) on AWS infrastructure, and Stripe for payment management. Vite for bundling and pnpm for dependency management.

Alcarcia - <https://alcarcia.com>

Electronic music artist / producer. – *Web:* Simple but solid React, a fundamental web project to understand the basics of the library, as well as to put certain visual resources into practice in a real environment.

Polymorphism Records - <https://polymorphismrecords.com>

Record label. – *Web:* HTML, CSS and JavaScript. Currently migrating to a stack similar to Hackeed's in order to consolidate a simple store and sell directly without depending on Bandcamp.

MeowRawr - <https://meowrawr.org>

Self-hosted feline wiki. – *Web:* HTML, CSS and JavaScript on 11ty to dynamically manage the cat profiles and easily maintain the templates with Handlebars. I use an 8GB Raspberry Pi 4 with Debian to host the site, Nginx as web server and Cloudflared as a tunnel to reach the Internet.

> WORK EXPERIENCE

Founder - Hackeed (Jan 2026 - Present)

Serverless Full-Stack development. Thanks to this project I indirectly learn about self-hosting, GNU/Linux system administration, networking, hacking (pentesting) and more. The possibilities with the devices I sell are endless.

Front-End Developer - Vocento (Mar 2023 - Jan 2026)

Front-end development for Vocento websites (Turium, Welife and ABC). Building and maintaining responsive interfaces with HTML, CSS, JavaScript and PHP templates for dynamic content management, preparing it so editors can modify the content with WordPress. I also built and managed email marketing campaigns.

Hybrid Designer - Cheil Spain (Jan 2020 - Dec 2022)

Design of promotional digital pieces for Samsung campaigns and HTML, CSS and JavaScript development for retailer websites such as Fnac, Worten, El Corte Inglés and more, as well as the Samsung Spain website. Brand consistency and compatibility across countless browser versions.

Career gap - London (Feb 2019 - Jul 2019) / Madrid (Jul 2019 - Dec 2019)

Launch of Polymorphism Records (Project) during a 5-month stay in London (my business partner lives there) and start-up from Madrid.

Front-End Developer - Amaris (Jun 2018 - Dec 2018)

After working on a project for the insurance company AXA with the Liferay CMS at Nateevo, Amaris hired me to work directly at AXA as a front-end developer for a web application and a mobile one, both based on Liferay.

Front-layout - Nateevo, Vass Group (Jan 2018 - Jun 2018)

Support and resolution of layout issues for web applications and portals of several clients, commonly on content management systems (CMSs), including the AXA project on Liferay.

Research Grant - GING, ETSIT / UPM (Sep 2016 - Jun 2017)

Front-end development for web projects, implementing UI designs and solving layout issues.

> EDUCATION

Bash Microcredential - Universidad Carlos III (2025)

Bash scripting fundamentals, GNU/Linux system administration and CLI integration.

50h JavaScript Course - Asociación Española de Programadores Informáticos (2019)

Training focused on JavaScript, from basic to intermediate level.

300h of Web Design and Development - Escuela CICE (2016)

Full-stack web development: HTML, CSS, JavaScript, PHP and MySQL.

Degree in Graphic Design - Escuela Superior de Diseño de Madrid, ESDM (2012 - 2017)

248 ECTS. GPA 7.5/10. Curricular internship at Caser as a graphic designer (Jan 2016 - Jun 2016).

Erasmus+ - Aalto University, Finland (2015, 1st semester)

> TECHNICAL SKILLS (special mentions in order of proficiency)

Web Languages: HTML, CSS (Sass), JavaScript, PHP (for front-end templates)

Frameworks and Libraries: Vue3, 11ty (Handlebars), React

Front-End Mastery: responsive design, pixel-perfect UI, ultra-efficient DOM

Build and Tooling: Git, Vite, npm (pnpm), Webpack

CMSs (Content Management Systems): WordPress, Liferay, AEM, Drupal

Platforms: Netlify, Neon (PostgreSQL), Stripe

Infra and DevOps: GNU/Linux (Bash), self-hosting, Docker, VPNs, DNS, TCP/IP, OpenWrt, Raspberry Pi

Design: Main Adobe tools, Figma, visual and brand composition

> LANGUAGES

Spanish: Native **English:** Fluent (high professional proficiency)
